ONLINE VOTING SYSTEM PROJECT REPORT

Submitted By:

Name: Riya Mandloi
Enrollment Number: DX2411055
Course: BCA II Year
Project: Online Voting System
College Name: Acropolis Institute of Management Studies and Research

1. Introduction

The Online Voting System is a web-based application that allows users to vote online. This project is developed using PHP and MySQL. The main purpose of this system is to make the voting process simple, fast, and paperless.

2. Objective

- To make the voting process digital
- To reduce paperwork
- To provide a fast and secure system
- To ensure that each user can vote only once

3. Technologies Used

- HTML
- CSS
- JavaScript
- PHP
- MySQL

4. Modules

1. User Registration & Login
2. Admin Panel
3. Voting Section

4. Result Section

5. Working of Project

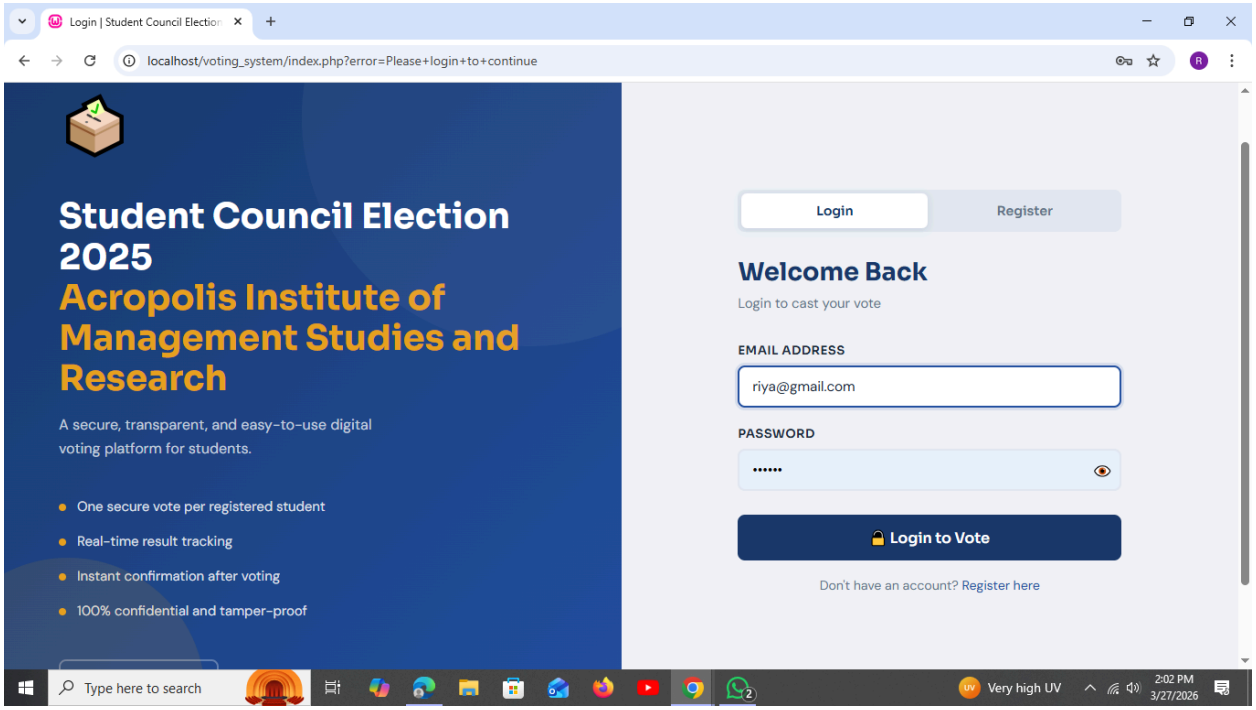
First, the user registers and logs into the system. After logging in, the user can view the list of candidates and cast a vote. The admin manages candidates and views the results through the admin panel.

6. Database

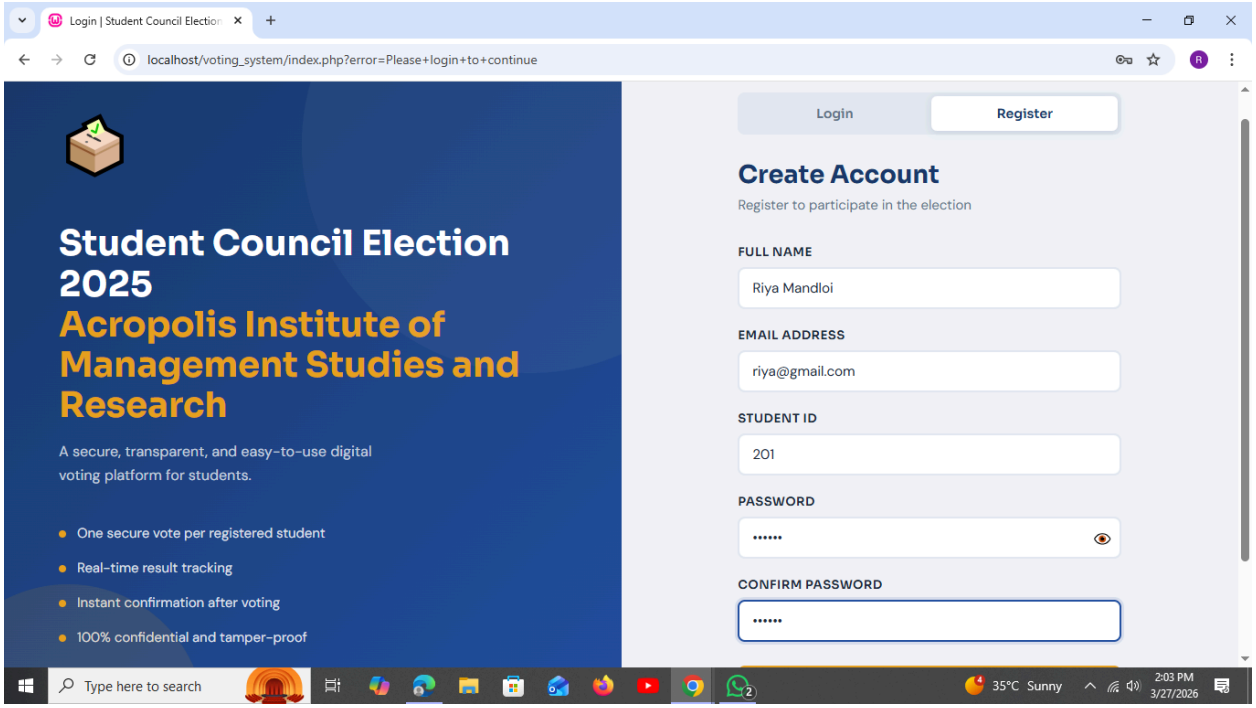
This project uses a MySQL database which includes:

- Users table
- Candidates table
- Votes table

7. Screenshots



- Login Page



- Register Page
